Profile

Results-driven Backend Software Engineer with 5+ years of experience designing, developing, and deploying production-grade software systems across ERP, HRM, LMS, POS, booking, and e-commerce domains. Strong expertise in backend engineering using Python and Laravel, RESTful APIs, microservices architecture, relational databases, cloud deployment, and AI-integrated systems.

Experienced in designing scalable architectures, implementing DevOps workflows, managing cloud infrastructure, and delivering real-world enterprise solutions from concept to production. Passionate about building maintainable, high-performance systems that solve operational challenges at scale.

Professional Experience

07/2025 – 01/2026 **Software Engineer (Full-Stack) & Project Manager**

Athurugiriya, Sri Lanka *Ceylon Business Partners (WebCeylon)* ☑

- Built full-stack platforms for ERP, booking, and automation using Laravel, Vue.js, React, TypeScript, MySQL, and REST APIs.
- Designed data models, API endpoints, and backend components aligned with business operations.
- Used Python for automation scripts and ML-assisted diagnostics in platform operations.
- Deployed to VPS/cPanel/AWS environments with DNS, SSL, SMTP, CI/CD (GitHub Actions), and monitoring.
- Coordinated directly with clients and stakeholders to define requirements and translate workflows into technical solutions.

01/2024 – 06/2025 **Software Engineer (Full-Stack)**

Colombo-08, Sri Lanka *eSupport Technologies (Pvt) Ltd* ☑

- Developed enterprise platforms including LMS, ERP, e-commerce, and booking systems using Laravel, React, Vue, TypeScript, and MySQL.
- Integrated external APIs, payment gateways, email/SMTP, and third-party services for production systems.
- Used Python for automation tasks and telemetry processing to support diagnostics and workflow improvements.
- Collaborated with product and design teams to improve UX, system workflows, and operational efficiency.

01/2022 – 12/2023 **Associate Software Engineer**

Malabe, Sri Lanka *Centival Software Solutions* ☑

- Contributed to Laravel-based systems by implementing backend features, fixing bugs, and enhancing authentication and REST API modules.
- Worked with Git for version control, MySQL for data operations, and Blade templates for UI components.
- Supported deployment and configuration tasks in staging and production environments.
- Gained hands-on experience across full-stack workflows and collaborative development practices.
